## About This Game

Doodle God is an addicting puzzle & world building game where players use logic and ingenuity to create the entire universe.

Starting with the basic elements of earth, wind, fire and air players can build a world filled with locomotives, Dragons, skyscrapers, Aliens and more. In Planet mode players will discover a challenging new way to develop the universe of their dreams.

As you create elements watch the world come to life as new combinations create new elements, life-forms and objects that propagate the planet's surface. But beware with great power comes great responsibility. Players need to be aware of unintended consequences like a zombie plague and other catastrophes! Test your divine knowledge and challenge your friends online with the new Tournament mode. Each time players successfully create a new item they'll be rewarded with wit and wisdom from some of the greatest philosophers and comedians of all time. Unleash your inner god with Doodle God™ for Steam!

More than 1000 detailed reviews in gaming press, including:

Great Game, Gets more difficult later which is good. Real test of wit!. his game is simple and easy to pickup, it's a good way to pass time, You'll keep wanting to come back for more. The graphics are great, the idea is fantastic, but the overall game is poorly developed and seems like something the game maker developed on the trip to the grocery store. It doesn't seem like he took the time to develop his idea before executing it like this. this game is very addicting, I just wish it had a little more to it however.. For the times when you want to be mindless (random) and the times when you want to solve puzzles (guessing combinations). Pretty and decent music.. Excellent game! Nice to break the head a bit with puzzles and being God for a while feels good XD. Nice achievement of having all combinations, hard to do :v. It's not the fact that I don't agree with the price: It's pretty fair compared to charging \$10. It's the fact that I expected more than what I got from it. Because us users probably played this on the mobile device before or web, so we know everything from it. I mean♥♥♥♥♥ they don't even have Doodle Devil merged in with this one. That one was amazing!

I'm also giving it a down because the interface is really confusing for the while, but then it just become odd. Also the need to go to the World view everytime you discover a key element. That gets annoying.

'sides, Doodle God? I could think of a better arcade-y type game to come out on steam for the same price... Cough cough, Clash N Slash (hopeful). This is a game of trial and error... mix basic "elements" to create more complex elements, and so on, and so on. Spoiler alert, there is no doodling involved! There is also no intuitivity (it that a word?) involved either. I found myself waiting for the hint timer to recharge so I could move on, and after a while, the hints were not helpful as combinations became so random that they didn't make any sense. This game was good for 3.9 hours of trying to like it.. A phone game converted to pc.

---

Really good game to just play when you're bored. Ignore all of the people who are talking about micro-transactions: it asks you if you want to turn them on in the options menu.. A total nonsensical game, but oh so enjoyable nonetheless!. Great educational game. Made me learn a couple of things. Worth of playing.

. Very fun at first, but getting very tedious and boring after a while. A mobile port, little complexity. I'd, if ever, recommend getting this as a mobile version.. Doodle God is a PC port of a classic, casual, mobile game. The goal of Doodle God is to unlock "elements" by combining two previous elements already discovered. For example, you can combine Fire and Earth to make Lava, and then use Lava to combine and unlock more elements.

To be clear, there is not a lot of depth to this game. You can continue to try and combine elements, use the hints, and just guess your way to the end. There are however some clever jokes hidden into the combinations that will get a chuckle when you find them. The elements will grow into fantasy and technological "elements" such as Dragons, Rockets, and Magic, so things do escalate over time.

This game is not for you if you are expectating a grand experience, or a super deep simulator. This is a game best played on a tablet, and can provide some hours of casual fun.

Achievement Quest: The achievements are annoying in this game, where you have to find every reaction in the game (some of the elements have repeats). There are some guides online that have every reaction, so use that and work to find duplicates as needed. If you use hints, you will have to repeat the main quest to get the achievements.. really addicting game.. once u start it u have to collect more elements!

very simple and kinda fun....

play time and replayability is pretty huge

i do recommend it

. relaxing game to do while you listening to something.. <https://youtu.be/fqH78-d7zmE>

While not a religious person myself if there is a god and they are even a little like the god showed in this game it's pure proof against intelligence design .

Starting with just the four basic elements start smashing them together to discover new elements. Then take those new elements and smash them together, repeat this process finding newer and weirder combinations.

If there was a consistent logic to how the combinations were unlocked this could be a reasonable puzzle game, however after the initial basic ones it all goes off the rails and becomes the the worst part of adventure games: combining stuff inside the inventory.. Puzzle game, You combine elements to create stuff on your planet as well as various scenarios. Can be quite relaxing.
